

ComfortMap

COMFORTMAP

The trust layer for elderly care

Live transparency between care homes and the families who love them.

SEED INVESTMENT DECK · 2026

comfortmap.ro

01

— THE PROBLEM

A BLIND, HIGH-STAKES DECISION

- Families hand over the people they love most — with no window into daily care.
- Staff lose hours every week to repetitive calls from anxious relatives.
- No transparency means no trust — and good homes silently lose occupancy.

4.6M

Romanians live abroad — families who cannot simply visit.

WHY THIS, WHY NOW

THE TIMING IS NOW

Aging demand

Residential elderly-care demand is rising fast across Europe.

A diaspora that pays

Millions abroad will pay for daily peace of mind.

Regulation rewards proof

Inspections (DSP / ANPIS) favour documented, transparent homes.

A digital gap

The sector still runs on phone calls and WhatsApp.

02

— THE SOLUTION

TRANSPARENCY, AUTOMATED

Staff log a 2-minute daily journal. Families see updates, photos and a weekly report — instantly. Peace of mind stops depending on a phone call.

2 min

daily staff effort

Real-time

family visibility

Certified

ComfortMap trust badge

03

THE PRODUCT

WHAT THE APP DOES

Daily journal

Staff document care in 2 minutes
— meals, mood, activity, sleep.

Daily photos

One photo a day is worth more
than ten phone calls.

Direct messaging

Private, GDPR-safe chat between
the home and the family.

Weekly report

An automated wellbeing summary
every Monday at 7:00.

04

— TWO-SIDED NETWORK

EARN THE BADGE. WIN THE FAMILY.

Public ComfortMap profile

Every member home gets a public page — discoverable when families search.

ComfortMap Certified badge

A visible trust mark, on the door and online, that competitors must earn.

Directory placements

Families discover, compare and choose — homes fill beds through the platform.

DE-RISKED EXECUTION

ALREADY BUILT. ALREADY LIVE.

Everything here is the real product — in production today at comfortmap.ro.

In production

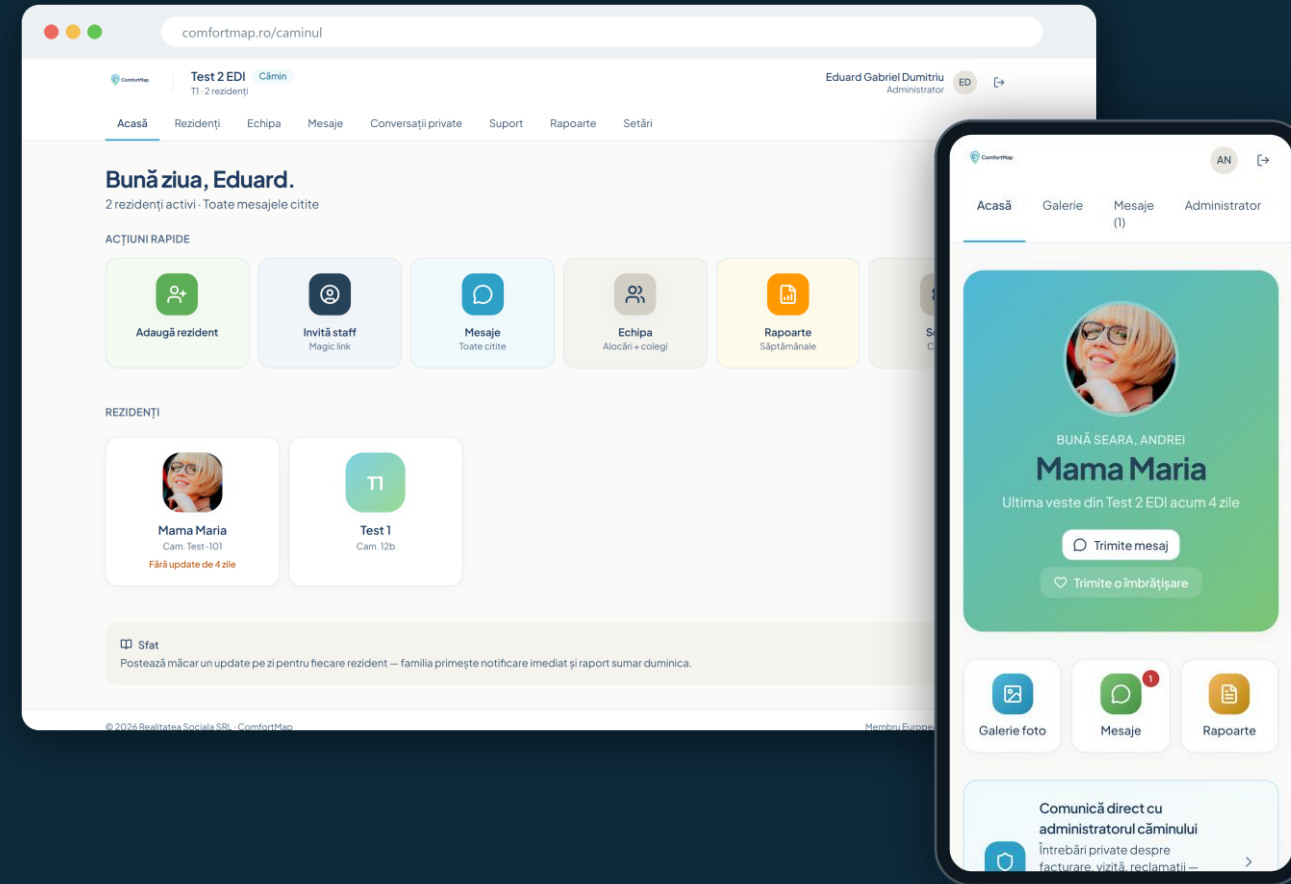

Families and homes using it live, every day.

Security-hardened

Independently audited · GDPR-remediated.

EU-hosted

Data in Frankfurt · reports generated server-side.

Staff dashboard + family app — the real ComfortMap.
COMFORTMAP

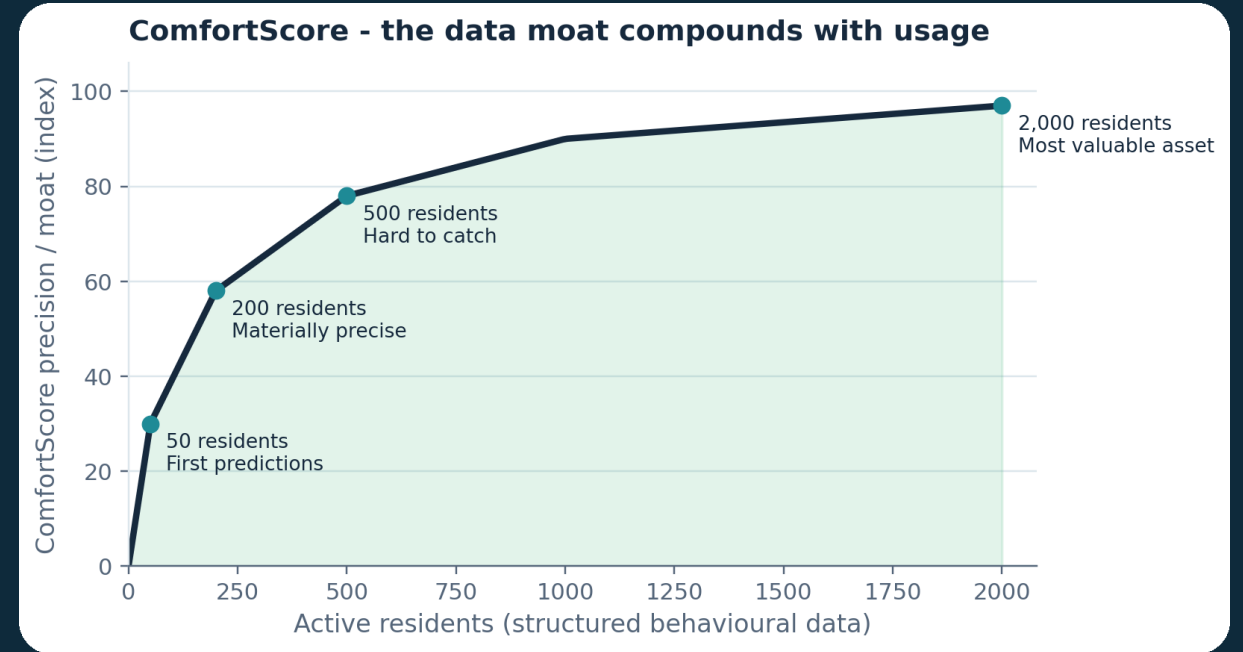

05

DEFENSIBILITY

COMFORTSCORE — THE DATA MOAT

A proprietary AI score of comfort and care quality, built from structured daily behavioural data.

The more homes and residents use ComfortMap, the more precise the score — and the harder it is to replicate.

— WHERE THIS GOES

THE DIGITAL TWIN

A predictive wellbeing model of each resident's daily life.

Predict, don't react

Early signals for health and quality-of-care, surfaced before they become incidents.

From app to infrastructure

ComfortMap becomes the data layer the entire sector runs on.

Durable enterprise value

The asset that underwrites a premium, defensible valuation.

THE OPPORTUNITY

A MASSIVE, GROWING MARKET

€1.05T

Global elderly-care services
market, 2025

5.8%

Annual growth (CAGR) toward
€1.74T by 2034

€325B

European serviceable market

**600–
800**

Private care homes in Romania
today — thousands across CEE

Land in Romania → expand across CEE → Europe. One transparent home at a time.

THREE REVENUE STREAMS

01

RECURRING

Membership SaaS

Managed service per home, billed monthly by resident tier.

€150 / €250 / €350 / €450 per month + €250 setup

02

MARKETPLACE

ComfortMap Directory

Booking-style placement fees plus premium listings.

~€300 per placement · ~9 placements / home / year

03

FUTURE

Data & insights

ComfortScore benchmarking and sector intelligence.

High-margin, future upside on a unique dataset

DIRECTORY ECONOMICS

REVENUE FROM OCCUPANCY, NOT GUESSWORK

- You can only be listed if you are a paying member — listed homes = members.
- Placements are modelled on real bed turnover, not optimistic assumptions.
- A marketplace layer that compounds on top of recurring SaaS.

Directory economics - placement revenue derived from occupancy

~50 beds per home

baseline capacity

× ~30% annual turnover

= ~15 vacancies / home / yr

ComfortMap fills ~60%

= ~9 placements / home / yr

€300 per placement

= ~€2,700 / home / yr

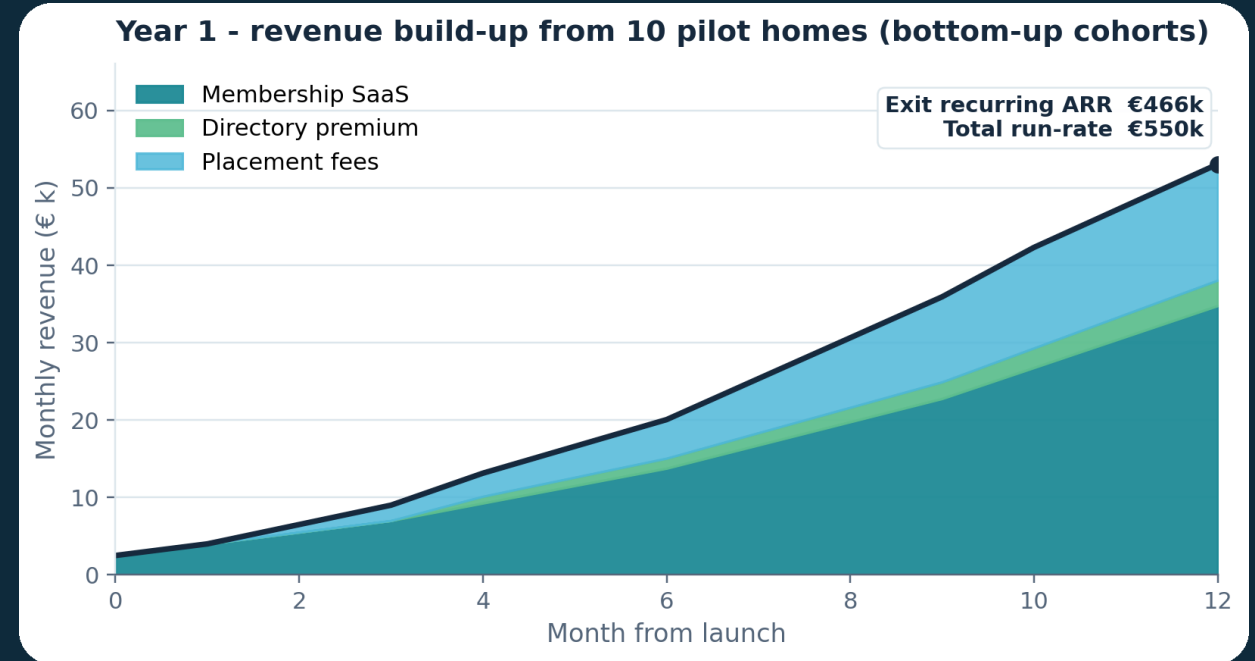

BUILT BOTTOM-UP

FROM 10 HOMES TO €466K ARR — YEAR 1

We start from ~10 pilot homes and grow month by month with a conservative 10% annual churn.

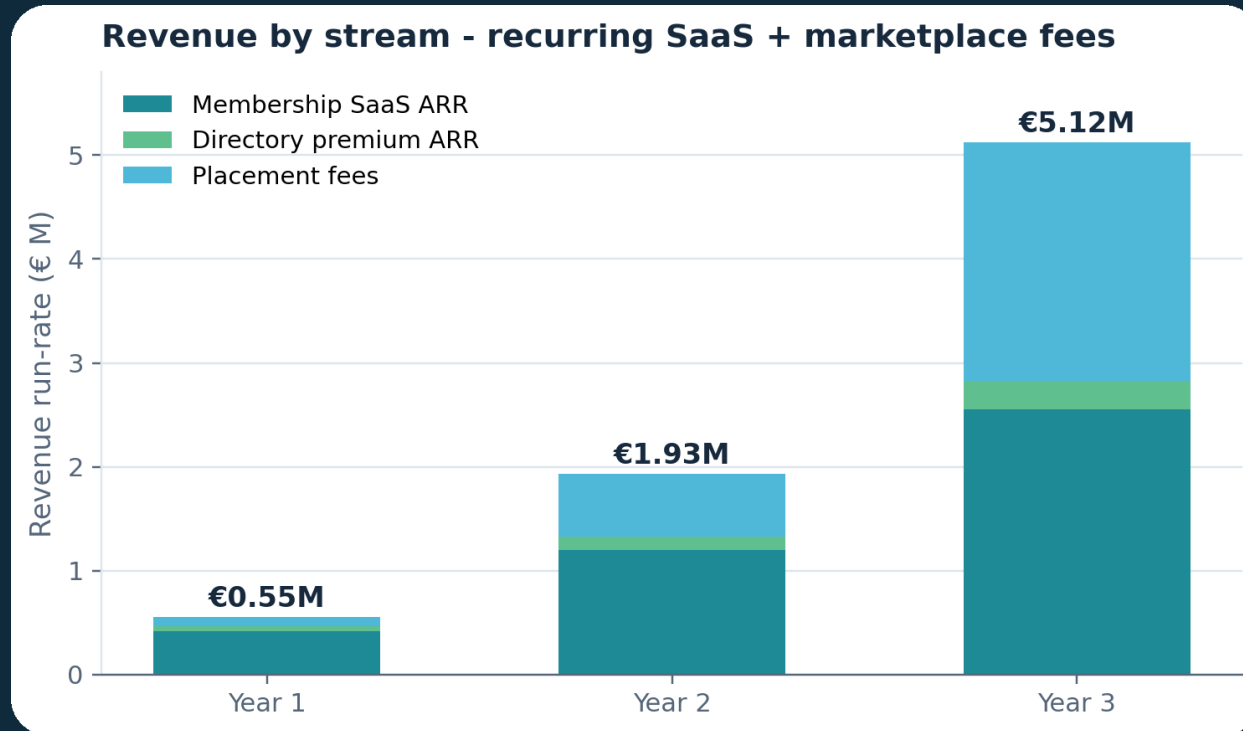

We separate exit ARR (run-rate) from recognised revenue (cash on the ramp) — investor-honest.
